Possible Add-ons

*By extending your stay, we will include your accommodation in Reykjavik with the activity of your choice.
The cost of your activity will depend on the number of participants.*

1. SILFRA & HVAMMSVIK

Venture to snorkel between the tectonic plates using top-notch equipment to protect you from the cold (dry wet suit). End the day relaxing in the Hvammsvik hot springs located right in the Atlantic Ocean, combining both experiences. Additionally, the facilities are located at a significant point in World War II history. The combination of both activities promises to be a unique experience.

2. INTO THE GLACIER

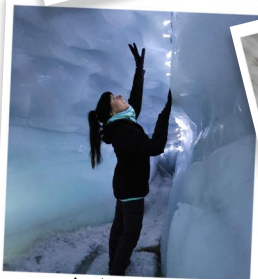

This is the world's largest man-made tunnel inside a glacier. It is located within Iceland's second-largest glacier, Langjökull, and has been one of Iceland's main attractions since its creation in 2012. The tunnel extends over 1,800 feet into the heart of the ice, and almost 100 feet below the surface. The tunnels are atmospherically lit to highlight the natural colors of the ice, which change as you go deeper.
